

COMPLETION SERVICES

Axis Energy Services is optimizing completions by pioneering a new service model for today's shale operators. No longer do you have only two choices for completions: coiled tubing that becomes increasingly unreliable in longer laterals, or slower stick pipe that requires too many companies on site. Axis has created a third option that combines the advantages of both approaches. Our integrated completion services offer the extended reach of stick pipe along with a technology focus, new efficiencies and simpler operations for our customers.

SERVICES

Frac Plug Drill Outs

Axis reliably completes your longest laterals to the toe while minimizing well cycle times and costs through our:

Technology Leadership & Data-Driven Approach – Axis is investing in equipment sensors and other technologies to drive safer, more efficient completions through better data.

- Pre-job planning to identify and mitigate potential downhole issues.
- Real-time data acquisition and post-job analysis to optimize drilling operations and inform continuous improvement.

Experienced, Cross-Trained Crews – Axis is building on the experience of our veteran crews while integrating the next generation into our culture of safety and execution excellence.

- Veteran 24-hour completion crews have performed hundreds of drill outs.
- Leading-edge training culture combines on-the-job experience with new approaches such as virtual reality.

Purpose-Engineered Equipment – Our fleet is purpose-built for long laterals and high-intensity, pad-based completions, including some of the tallest mast rigs in the sector.

- High mast rigs up to 117' – 50% of our fleet has masts 110' or taller.
- 300,000 lb hook load capacity rigs – we can safely and effectively reach the toe of the longest laterals.
- Highest horsepower range (750-2,500 HP) of fluid pumps in the industry provide constant rate and pressure, ensuring smooth drilling operations

while maintaining turbulent flow to remove sand and debris.

- Complete well site support equipment including high-torque swivels and extended-reach catwalks.

Tube Ups

Axis provides fast, reliable service to run production tubing following frac plug drill outs.

FLEET INVENTORY

Workover Rigs

- 117', 110', 104' or 96' Mast
- 250,000-300,000 lb Hook Loads

Drill Out Fluid Pumps

1,500 HP, 1,000 HP, 700 HP or 600 HP

Power Swivels

10,000 psi

Hydraulic Catwalks

35-40'+ Reach
