

**1,500 HP  
CONTINUOUS-DUTY  
PUMPS**

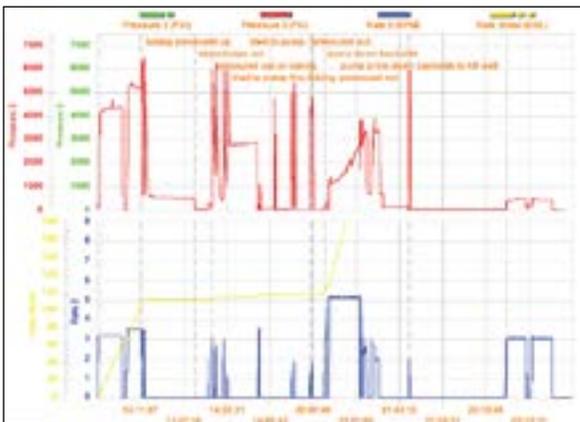

Axis Energy Services' 1,500 HP continuous-duty pumps are custom-manufactured and purposeengineered for 24-hour drill out work.

These next-generation pumps deliver constant flow rate and pressure to ensure smooth drilling operations while maintaining turbulent flow to remove sand and debris.

They can also integrate with other Axis pumps—sizes 1,000 HP and up—all run from one control center.

Additional capabilities include automated pressure testing, advanced data acquisition and chemical mixing on the fly.

In addition to completions, our multi-purpose pumps are ideal for coiled tubing assist, workover operations, pump down services and general pump applications.

**SPECS**

**7601 Twin Disc Transmission**

No torque converter – pump at any rate, no lock-up requirement

**1,500 HP MTU-16V 2000 Tier 4 Engine**

EGR emissions control and ADEC engine control system

**Gardner Denver 2,500 HP 4" Quintuplex Pump**

Arrives on location with all fluid end expendables and tools to be serviced in the field

**Onboard Mixing System**

- Twin 15 bbl mix tanks with hydraulic-driven augers
- Twin hydraulic-driven 6x5x13 mission magnum c-pumps with mechanical seals

**Digital Data Acquisition**

Rolligon controls with Dastrac digital recording
