Double Studded Adaptors (DSAs), Spools & Flow Crosses

5,000-15,000 psi

Annular Preventers

5,000 psi

Environmental Pans

Safety Valves

Full Drift & Double Seated

Axis Energy Services provides high-pressure blowout preventers, ranging from 5,000- 15,000 psi, and auxiliary equipment to control your well during completion and workover operations. We specialize in assembling well control packages with a variety of single and double BOPs and ram blocks. Full certification documentation is available.

Torque and Test

Axis offers a new, data-driven torque and test service line that focuses on precise recordings and faster torque times:

- Infused with Axis CORE®, a proprietary data acquisition and predictive analytics system, the testing units record both torque pressure measurements and proper testing to ensure accuracy of API torque specifications.
- A diesel-powered hydraulic booster system accelerates torquing speeds up to five times faster than conventional hand-held power packs.
- The pressure testing pump is a 20,000 psi unit powered by a pre-emissions diesel engine.
