

PRESSURE CONTROL SERVICES

Axis Energy Services operates one of the country's largest rig assist snubbing fleets, with next-generation snubbing service units featuring advanced safety systems. Our crews include some of the most experienced snubbing operators in the industry, trained on our leading-edge virtual reality technology. Axis specializes in rig assist snubbing packages for extended-reach drill outs, particularly under high pressure.

SERVICES

Rig Assist Snubbing

Axis uses the safest and most efficient equipment available. Our equipment can be used with a wide variety of rig set-ups, from a small single workover rig to a large triple drilling rig. Most of the components on our rig assist units are designed by Axis, then field proven by our experienced personnel. They work closely with our designers and fabricators to ensure Axis offers you the best equipment and latest innovations in a durable package that can handle even the most demanding conditions.

Axis offers both larger units with a lift capacity of 170,000 lbs/push of 90,000 lbs, and compact units with a lift capacity of 75,000 lbs/push of 50,000 lbs. All snubbing units are:

- **100% Certified** – All structural and pressure containing components have complete engineering and material certifications.
- **Equipped for safety** – SlipSmart system ensures slip is positioned correctly and won't open until load is transferred; SnubSmart system features lights and beacons indicating ram position and throttle control to limit rig's pulling power.
- **Highly mobile** – Truck-mounted units can reach even the most isolated locations and provide tremendous flexibility on crowded pad sites.
- **Built tough** – Can withstand extreme weather, with operating temperature range of -31°F to 122°F.

Freezing

At Axis, we know the safety of any freeze application is directly related to experience. Our team offers years of experience in freeze applications for a wide range of situations, with pressures up to 10,000 psi.

Hot Tapping

Axis offers years of hot tapping experience and a wide range of pressure release and penetration options. We can also accommodate customers with uncommon, one-off needs.

- Hot tap systems covering pressure ranges of 5,000-10,000 psi
- Ability to penetrate various pipe sizes, well head valves, pipelines and other applications with ½"- 2" hole sizes
- Large assortment of saddle clamp systems to meet a range of size requirements
